[e-drug] Japan drug formulary (cont'd)

- *Subject*: [e-drug] Japan drug formulary (cont'd)
- *From*: Hank Malinowski <malinowski@cder.fda.gov>
- *Date*: Tue, 30 Oct 2001 11:40:31 -0500 (EST)

```
E-drug: Japan drug formulary (cont'd)
--------------------------------------------------------------------

You've already discovered probably the best site in Japan for
English language drug information about drugs in Japan, the Japan
Pharmaceutical Reference. This is the Japan equivalent of the PDR,
and, like the PDR, does not include all approved drugs.

If you have a lot of patience, you can explore sites in Japanese by
using the internet page translation available here:
http://www.cafeglobe.com/cafe/wotg/index_en.html  Just copy any
Japanese site address into the LinguaWeb box and you'll get the
Japanese page with English translations.

Detailed information about recent approvals, in Japanese, including
drug price information, may be found here:
http://www.nichiyaku.or.jp/  A typical page of information is here:
http://www.nichiyaku.or.jp/news/n010601.html . For example, the
first entry on this page is for olanzapine tablets and costs are 2.5
mg (155.7 yen), 5 mg (293.4 yen), 10 mg (553 yen).

For recent drug approvals in Japan and other regulatory information
you might want to check this English site:
http://www.jouhoukoukai.com/

There is a book of all drug prices (in Japanese) available from:
http//www.jiho.co.jp

I spent a year in the Ministry of Health, Labor and Welfare in Japan
as part of the Mansfield Fellowship program and I try to keep up on
drug information available from Japan. Hope that this helps.

Hank Malinowski, Ph.D.
Mansfield Fellow
